Assessment

☒ Midterm

☐ Final

Course: HCI 101 – Human & Computer Interaction

Semester: First Semester

School Year: 2025 – 2026

ASSESSMENT ITEMS

1. Which of the following best describes the goal of usability in Human-Computer Interaction?

- A.** Maximizing visual complexity
- B.** Ease of use and learnability
- C.** Reducing hardware cost
- D.** Increasing code volume

2–3. Explain the difference between an affordance and a signifier, and give one interface example of each.

4. Design a low-fidelity wireframe for a mobile login screen. Your work will be graded using the rubric below.

Rubrics

Criteria	Description	Weight	Pts
Clarity	Layout is clean and elements are clearly labeled	40%	4
Usability	Follows established interaction and accessibility principles	40%	4
Creativity	Introduces a thoughtful, original design element	20%	2
Total		100%	10
